June 2018 - After a wet start to the month with over 20mm falling on the 2nd, things began to settle down. But a very windy spell on the 14th with a little rain caused damage in some areas nearby, the strength of the wind was unusual for the time of year. Then we began our dry spell and heatwave, peaking on the 28th with a high of 29.1c. There was no rain after the 20th. As a result rainfall was well down with just 55.4% or normal. Mean Max was 19.6c equalling the highest set back in 2010. Overall mean was 14.8c which equals the record of June 2014. At least there was some thunder which was heard on 3 days early in the month. Sunshine was well above average and was the sunniest June on record with 157.9%
